# Directions:

1. Print your guide on 8.5 x 11 inch paper. Be sure your print orientation is set to landscape.
2. Fold top third back, then fold botton third back on dotted line to make a triangle, so that just the notated key board is facing at front.
3. Prop up paper behind the black keys on your keyboard with the illustration side up as a guide.
4. Align keys on printed guide with your keyboard or piano keys. Start at the middle C key.
5. Repeat for as many octaves as you would like guides for (overlap C to C keys on the guide print-outs).
